Ivaylo Yovkov

Junior Full Stack Web Developer / Senior Digital Marketing Expert / Graphic & Web Designer

About me

My name is Ivaylo Yovkov, I am 27 years old living in Sofia, Bulgaria. For the past 8 years, I have been working as a Web/Graphic Designer (mostly as a freelancer), as a Graphic Design Teacher and as a Marketing Specialist and Manager. I've decided to change my career and become a web developer as I've always been passionate about programming and technologies. In 6 months I've managed to complete a few courses and go from programming basics to building a full-stack web app.

I'm a fast learner and it has helped me to make a career change not once, but twice already. I love exploring and learning new things and that's what's keeping me motivated. Solving complex problems especially in creative and out of the box ways is by far my most favorite process. Oh.. and I love dogs!
